**FOR RELEASE: June 29, 2007**

## **O'Neil Introduces the microFlash 4t<sup>e</sup> Mobile Printer**

*Industry's Most Reliable Portable Printer Now Offers Wireless 802.11b/g, Bluetooth, and 10X Faster Processing*

**Irvine, California – June 29, 2007** – O'Neil Product Development, Inc., manufacturer of The Most Reliable Portable Printers™, today introduced the microFlash 4t<sup>e</sup> wireless portable thermal printer, providing dramatically increased processing speeds, expanded wireless communications, and enhanced security options. The 4t<sup>e</sup> is the enhanced evolution of O'Neil's legendary 4t printer; the industry's leading portable thermal printer and the de facto standard for route accounting and field mobile printing applications.

The 4t<sup>e</sup> gives the mobile worker their choice of 802.11b/g or Bluetooth wireless connectivity. To accommodate the need for faster transaction processing in the fast-paced world of field mobile applications, the 4t<sup>e</sup> printer incorporates a new 32-bit RISC ARM 9 processor allowing the printer to process complex applications up to ten (10) times faster and enabling the user to enjoy exceptionally high print throughput. Users can quickly determine the printer's Bluetooth, charging, and power status with the 4t<sup>e</sup>'s new external LEDs, and the new external charging capability enhances ease-of-use in the field. The 4t<sup>e</sup> also includes an optional built-in magnetic stripe card reader allowing the easy processing of credit or debit card payments. Of critical importance, the ultra-rugged 4t<sup>e</sup> offers users the same reliable service as its predecessor, which has been heralded for its reliability record. After six (6) years in the field, an incredible 89.47% – nine (9) out of ten (10) - 4t's have never seen a repair facility in the world's most harsh and challenging mobile applications.

The 4te produces top quality direct thermal receipts, proofs of delivery, labels and invoices for route accounting, direct store delivery, field service, logistics, home delivery and pre-sale systems. It can print up to 2,240 - 6" receipts on a single battery charge with automated power-saving sleep and wake-up modes. The 4te prints 80-column condensed font receipts, logos, graphics, and international character sets on lined or linerless media, with 4 MB of Flash and 2 MB of RAM. Additional enhancements make media loading and battery handling easier than ever.

"For the past seven years, our 4t mobile printer has set the industry standard for reliability," said Endre Vargha, O'Neil Product Development general manager. "The advancements and features offered to our customers on our new 4te even further outpace the capabilities of competitive printers. The 4te mobile printer reflects our commitment to remain the leading worldwide provider of reliable mobile printers, demonstrates our unique understanding of the printing needs of the mobile workforce, and reinforces our unrelenting commitment to continually improve the productivity and effectiveness of our customers."

### **About O'Neil**

Established in 1981, O'Neil Product Development, Inc. is a subsidiary of Dover Corporation and is the world's leading provider of reliable portable printing solutions. O'Neil designs and manufactures a complete line of mobile and wireless thermal bar code label and receipt printers, dot matrix impact printers and a variety of in-stock and custom media solutions. O'Neil printers are used around the globe in industries which include distribution, retail, manufacturing, law enforcement, utilities, transportation and an extensive array of business services. The company manufactures the industry's only complete line of printers, accessories, and development and support tools for route accounting, direct store delivery, and field mobile service applications. In addition to their own line of O'Neil-branded printers, the company manufactures mobile printing products in an OEM capacity for leading hand-held manufacturers, including a family of integrated hand-held computer and printer solutions. For more information, contact O'Neil at 949.458.0500 or visit <http://www.oneilprinters.com>.
