O'Neil Announces the OC3
3" Wireless Portable Thermal Label Printer

Streamlined Label Printer is 35% Smaller than the Closest Competitor

Irvine, California - July 9, 2007 - O'Neil Product Development, Inc., manufacturer of The Most Reliable Portable Printers™, and a subsidiary of Dover Corporation, today announced the availability of the O'Neil Compact 3 – The OC3 – 3" portable thermal label and receipt printer. Recognizing the necessity for a compact, streamlined, and reliable label printer, O'Neil has designed the OC3 to be approximately 35% smaller in total volume than the closest competitive label printer. The OC3 prints label and receipt media up to 3 inches wide and was created to meet the continually expanding requirements associated with retail, hospitality, transportation, warehousing, car rental, and healthcare applications. The OC3 is the newest member of O'Neil's OC line of mobile printing solutions; the industry's most light weight, streamlined and ergonomic family of portable label and receipt printers.

The OC3 maintains O'Neil's renowned reliability standard, and offers optional wireless local area 802.11b/g networking (WLAN) or wireless personal area Bluetooth network (WPAN) capabilities, as well as a wide variety of security options to meet the needs of the retail community. To accommodate the need for faster label printing, the OC3 incorporates a 32-bit RISC ARM 9 processor allowing the printer to process complex applications up to ten (10) times faster and enabling the user to enjoy exceptionally high print throughput. For "line/queue busting"

applications and easy processing of credit or debit card payments, the OC3 includes an optional built-in magnetic stripe card reader. It prints high quality labels at 203 dpi, utilizes Flash memory for fast adaptability to changing business requirements, and offers intelligent power management for longer battery life to increase user productivity and efficiency.

“The retail and label printing community has eagerly awaited a smaller, more reliable portable printer solution for shelf labels, price mark-down, and other labeling applications,” explained Doug Hall, vice president of marketing for O’Neil. “The small size and smart styling of the OC3, coupled with increased levels of wireless security, makes it a compelling choice anywhere reliable portable printing is a necessity.”

ABOUT O’NEIL

Established in 1981, O’Neil Product Development, Inc., a wholly owned subsidiary of the Dover Group, is the world’s leading provider of reliable portable printing solutions. In addition to their own line of O’Neil- branded printers, the company manufactures a variety of mobile printing products in an OEM capacity for leading hand-held manufacturers, including a family of integrated hand-held computer and printer solutions.

O’Neil printers are used around the globe in industries which include distribution, retail, manufacturing, law enforcement, utilities, transportation and an extensive array of business services. The company manufactures the industry’s only complete line of printers, accessories, and development and support tools for route accounting, direct store delivery, and field mobile service applications O’Neil designs and manufactures a complete line of thermal bar code label and receipt printers, dot matrix impact printers and a variety of in-stock and custom media solutions. O’Neil is uniquely focused on providing portable printers to the rapidly emerging mobile and wireless computing marketplace.
